DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to system diagnosing leaks in a fuel vapor recovery system, classified in class 73, subclass 49.7.
- II. Claims 13-14, drawn to method diagnosing leaks in fuel vapor recovery system based on fixed time pressure decay, classified in class 701, subclass 52.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product may use a fixed pressure and variable time decay method.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
